1 Special issue: AI in engineering
D. Sriram, R. Joobbani
April 1985   **ACM SIGART Bulletin**, Issue 92
Publisher: ACM Press
Full text available: 📄 pdf(8.79 MB)   Additional Information: full citation, abstract

The papers in this special issue were compiled from responses to the announcement in the July 1984 issue of the
posted over the ARPAnet. The interest being shown in this area is reflected in the sixty papers received from ove
papers were received over the computer network.

2 Fast detection of communication patterns in distributed executions
Thomas Kunz, Michiel F. H. Seuren
November 1997   **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative**
Publisher: IBM Press
Full text available: 📄 pdf(4.21 MB)   Additional Information: full citation, abstract, references, index terms

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagra
better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer de
Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overvie
experience, such tools display repeated occurrences of non-trivial commun ...

3 Fault Tolerant Operating Systems
Peter J. Denning
December 1976 **ACM Computing Surveys (CSUR)**, Volume 8 Issue 4
Publisher: ACM Press
Full text available: 📄 pdf(2.69 MB)   Additional Information: full citation, references, citings, index terms

4 Highly available systems for database applications
Won Kim
March 1984   **ACM Computing Surveys (CSUR)**, Volume 16 Issue 1
Publisher: ACM Press
Full text available: 📄 pdf(2.43 MB)   Additional Information: full citation, abstract, references, citings, index terms,

As users entrust more and more of their applications to computer systems, the need for systems that are contini

81 Jockey: a user-space library for record-replay debugging
Yasushi Saito
September 2005 **Proceedings of the sixth international symposium on Automated analysis-driven debuggi**
Publisher: ACM Press
Full text available: 📄 pdf(159.94 KB)   Additional Information: full citation, abstract, references, index terms

> Jockey is an execution record/replay tool for debugging Linux programs. It records invocations of system calls ar
> dependent effects and later replays them deterministically. It supports process checkpointing to diagnose long-ru
> Jockey is implemented as a shared-object file that runs as a part of the target process. While this design is the k
> safety and ease of use, it also poses challenges. This paper discu ...

82 Transaction processing monitors
Philip A. Bernstein
November 1990 **Communications of the ACM**, Volume 33 Issue 11
Publisher: ACM Press
Full text available: 📄 pdf(3.06 MB)   Additional Information: full citation, abstract, references, citings, index terms,

> A transaction processing (TP) application is a program that performs an administrative function by accessing a sl
> on-line user. A TP system is an integrated set of products that supports TP applications. These products include l
> processors, memories, disks and communications controllers, and software such as operating systems (Oss), dat
> (DBMSs), computer networks and TP monitors. Much of the integration of these prod ...

83 Human-computer interface development: concepts and systems for its management
H. Rex Hartson, Deborah Hix
March 1989 **ACM Computing Surveys (CSUR)**, Volume 21 Issue 1
Publisher: ACM Press
Full text available: 📄 pdf(7.97 MB)   Additional Information: full citation, abstract, references, citings, index terms,

> *Human-computer interface management*, from a computer science viewpoint, focuses on the process of developi
> interfaces, including their representation, design, implementation, execution, evaluation, and maintenance. This
> concepts of interface management: dialogue independence, structural modeling, representation, interactive tool:
> methodologies, and control structures. *Dialogue independence* is th ...

181 Replicated data management in distributed database systems
Sang Hyuk Son
November 1988   **ACM SIGMOD Record**, Volume 17 Issue 4
Publisher: ACM Press
Full text available: 📄 pdf(835.25 KB)   Additional Information: full citation, abstract, citings, index terms

> Replication is the key factor in improving the availability of data in distributed systems. Replicated data is stored
> accessed by the user even when some of the copies are not available due to site failures. A major restriction to ι
> copies must behave like a single copy, i.e., mutual consistency as well as internal consistency must be preservec
> replicated data in distributed database syste ...

182 Implementation of resilient, atomic data types
William Weihl, Barbara Liskov
April 1985   **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 7 Issue 2
Publisher: ACM Press
Full text available: 📄 pdf(2.19 MB)   Additional Information: full citation, abstract, references, citings, index terms,

> A major issue in many applications is how to preserve the consistency of data in the presence of concurrency an
> addressing this problem by implementing applications in terms of abstract data types with two properties: Their
> serializability and recoverability for activities using them) and resilient (they survive hardware failures with accej
> what it means for abstract data types to be atomic and ...

183 801 storage: architecture and programming
Albert Chang, Mark F. Mergen
February 1988   **ACM Transactions on Computer Systems (TOCS)**, Volume 6 Issue 1
Publisher: ACM Press
Full text available: 📄 pdf(1.87 MB)   Additional Information: full citation, abstract, references, citings, index terms,

> Based on novel architecture, the 801 minicomputer project has developed a low-level storage manager that can
> programming in subsystems and applications. The storage manager embodies three ideas: (1) large virtual stora
> and permanent files for the active programs; (2) the innovation of database storage, which has implicit propertie
> atomic update, similar to those o ...

184 Compiler and runtime support for efficient software transactional memory
Ali-Reza Adl-Tabatabai, Brian T. Lewis, Vijay Menon, Brian R. Murphy, Bratin Saha, Tatiana Shpeisman
June 2006   **ACM SIGPLAN Notices , Proceedings of the 2006 ACM SIGPLAN conference on Programmi**
